

# Mutual Accountability, and Agriculture Joint Sector Reviews in Mozambique

Greenwell C Matchaya, ReSAKSS-SA Coordinator (IWMI)  
*Presented at*

**MSU, IFPRI, MINAG Workshop on**

**Transforming Agricultural Systems in Mozambique**

9-10 December 2013

VIP Hotel, Maputo, Mozambique

# Outline

- Highlight the building blocks of the JSR process
- Highlight the JSR process in Mozambique

# Mutual Accountability and JSR

- Mutual Accountability (MA) is a core principle of CAADP; JSR is a key MA tool at the country level.
- JSR principles include national leadership and ownership, a strong evidence base, inclusive participation, and commitment to results by all participants.
- The primary purpose of a JSR is to determine and evaluate observed results of sector performance and their comparison with the intended results or targets in NAIP or agreement.
- The JSR process creates a platform to:
  - assess the performance and results of the agriculture sector
  - assist governments to assess effectiveness of sector policies and strategies

# MA/JSR

- assess how well state and non-state actors have implemented pledges and commitments (laid out in CAADP compacts, NAIPs, and other agreements)
- guide decisions to continue with or make adjustments in implementation of NAIP or agreement
- **JSRs review five main areas:**
  - Development results
  - Agricultural sector performance
  - Financial and non-financial resources
  - Policies, programs, institutions, and implementation processes
  - Linkages, enabling environment, and assumptions

# The Mozambique Process

Activity	Time	Comment
Evaluate the existing JSR process within the institutional Architecture Assessment;	June 2013	Completed
Develop TOR for JSR members- broadening to include private sector and CSO	June 2013	Completed
Consolidate into a single policy matrix (G8; Development Policy Options-DPO and PNISA)	on going	Ongoing
Review and develop JSR indicators	August 2013	In progress
Develop TORs for the JSR	June 2013	Completed
Prepare for JSR	September 2013	

# Building blocks of a JSR:

Step
Set up a JSR steering committee chaired by Ministry of Agriculture
Establish JSR secretariat
Develop terms of reference for the JSR
Assess agricultural review and dialogue processes, data quality, and analytical capacities
Mobilize resources (human and financial)
Constitute review team
Undertake analytical/technical studies ( <i>Todd will be talking about the Initial effort in showing how the JSR report for Mozambique could look like</i> )
Organize review and dialogue
Draw implementation and follow-up plan for the recommendations from the JSR
